

METROPOLITAN PERIODONTISTS, P.A.

HYGIENE STUDY CLUB

2026 | 2027
Season Calendar

Practical periodontal conversations designed for the everyday hygiene chair

ALL SESSIONS

Dinner 5-5:30PM

CE 5:30-7:30 PM

Location: To Be Determined

WED SEP 23

Beyond the Biofilm

***Clinical Reasoning, Instrumentation
& Periodontal Diagnosis***

Look beyond pocket depths and plaque to connect disease patterns, patient risk, instrumentation, and staging and grading. The focus is on understanding why disease is happening and what should happen next.

WED OCT 21

Thinking Like a Periodontists

***When Nonsurgical Treatment
Is Not Enough***

What do we do when SRP, home care, and maintenance are not getting us where we want to be? We will look at advanced periodontal treatment, gingival grafting, and when referral may be the right next step.

WED FEB 3

Seeing Beyond the Implant

Peri Implant Health & Disease

Learn how to recognize implant health, mucositis, and peri implantitis by putting probing, radiographs, history, and risk factors together. We will discuss when to monitor, intervene, or refer.

WED MAR 24

What Would You Do Next?

Interactive Periodontal Case Study

Work through real clinical and radiographic findings together. What stands out? What information might still be missing? Would you treat, monitor, change the maintenance plan, or refer?

WED APR 7

The Next Best Decision

Interactive Periodontal Case Study

Build on the year with additional patient cases, treatment options, and the reasoning behind each decision. The goal is more confidence working through the gray areas of periodontal care.
